

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

REPORT OF THE CURATORS.

The Curators present the following statement of the Curator-in-charge, Prof. Angelo Heilprin, as their report for the year ending November 30 :—

The condition of the Academy's collections, although it cannot be stated to be absolutely satisfactory, is yet fairly good when compared to the condition of similar collections in this country, or even of those pertaining to foreign institutions. Much, however, remains to be done before either the interests of science or of general education will have been thoroughly satisfied, and until more efficient aid is added to the working power of the Academy, progress towards the obtaining of this satisfied condition must be necessarily slow. The great obstacle in the way of the systematic arrangement of the collections has thus far been, and still remains, want of space, a weighty obstacle which must ever remain as such until greater expansion will have been afforded in the construction of an extension to the present building.

The removal, at a very moderate expense, of the large central platform on the floor of the museum has permitted of a much more satisfactory arrangement of the extensive series of geological and palæontological specimens than has heretofore been possible, and has at the same time afforded room for the gathering together and proper exhibition of a special collection—namely, a collection illustrative of the natural products of Pennsylvania and New Jersey. In this "local museum," as it may be termed, it is intended to illustrate by actual specimens (as far as is practicable) the entire domains of zoology, palæontology, geology and mineralogy, in so far as these departments are directly connected with the States above mentioned, and thereby very materially facilitate the means for self-instruction in natural history, and for making such immediate examinations and comparisons as may be variously demanded. Work in the arrangement of this collection has been progressing favorably, and it is hoped that the entire exhibition will be satisfactorily displayed in the early part of the coming year.

The most important addition made during the past year to the Academy's museum is the Vaux collection of minerals and archæological implements, to which reference is made in the report of

the special Curator appointed for those collections, Mr. J. Binder, by whom the specimens have been carefully arranged and classified. The other additions to the museum are recorded in the list of donations herewith appended, or are incorporated in the reports of the different sections.

The Academy has during the year benefited through the services of three Jessup Fund beneficiaries, Messrs. J. Wortman, A. F. Gentry, and S. F. Aaron, respectively in the departments of vertebrate palæontology, ornithology, and entomology, the first of whom has latterly resigned on receiving the appointment of assistant to the Curator-in-charge. An application for the filling of the present existing vacancy in the Jessup Fund is now in the hands of the Curators.

JOSEPH LEIDY,

Chairman of the Board of Curators.

SUMMARY OF THE REPORT OF THE TREASURER,
FOR THE YEAR ENDING NOV. 30, 1883.
